

ACCRAPLY REVOLVE™

Improve output, reduce downtime, and enhance productivity with Accraply's next generation Seaming solution - the Accraply Revolve.

The Revolve has an intuitive design that reduces operator dependency and enables you to streamline and improve your operations.

Accraply's modular and configurable seaming solution, and operator-friendly design offers unparalleled flexibility, customization, and scalability.

IMPROVE OUTPUT, REDUCE DOWNTIME AND ENHANCE PRODUCTIVITY

- Improve your output while maintaining quality - the Revolve is the fastest commercially available seamer on the market - with both Single Shaft and Fully Continuous configurations available
- Decrease your setup time and increase uptime by eliminating set-up variables and opportunities for operator error (5 minute job set-up with unlimited recipe repeatability)
- Reduce waste and enhance productivity via the Revolve's Automatic Roll Map Generating option which enables identification of upstream printing process errors

SIMPLIFY & STREAMLINE YOUR OPERATION WITH AN INTUITIVE DESIGN

- Non-crashable forming table: intelligent machine design restricts the operator from inputs that drive it out of specification - reducing operator dependency and improving uptime by eliminating forming table crashes
- Leverage a next generation controls platform coupled with a full color HMI that dramatically simplifies operation and increases throughput - step-by-step on-screen help guides, diagnostic reporting and preventive maintenance alerts. In addition, efficiency reporting, video tutorials, and on-board parts ordering are standard features
- Reduce waste and rework with automatic layflat correction - reducing operator dependency and ensuring premium roll quality

BUILT TO FIT ANY OPERATION & OFFERING UNPARALLELED FLEXIBILITY

- Create the right machine to fit your business with flexible unwind, rewind, and speed options
- Time your capital investment - Accraply Revolve's intuitive modular design makes field upgrades easy and enables you to invest in more advanced seaming capabilities as your business grows
- Innovative, operator-centric options including the Management Information Systems (MIS) that allows the machine to pull job data and set itself up accordingly

BUILT TO FIT ANY OPERATION & OFFERING UNPARALLELED FLEXIBILITY WITH OPERATOR-FRIENDLY DESIGN

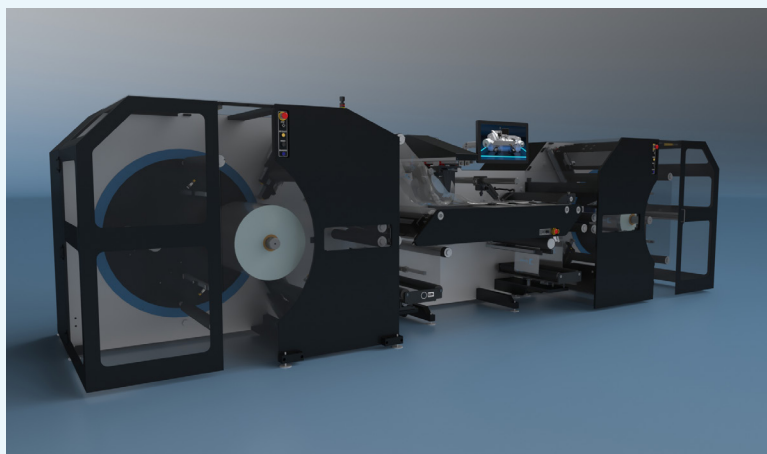

- **Machine Module Recognition** - Understands what modules are being used and configures itself automatically - no field service needed
- **True Plug & Play** - Create the right machine to fit your business with flexible unwind, rewind, and speed options

ACCRAPLY REVOLVE™ RT2

- Adds two position rewind turret to the Accraply Revolve
- Rewind transfers at full speed (400 & 600 meter per minute speeds)
- Innovative tamp design minimizes web shock during transfers - reducing the risk of web breaks
- Smart guarding designed to allow for safe loading and unloading while the machine is running

ACCRAPLY REVOLVE™ FULLY CONTINUOUS

- Everything great about the RT2, plus a two position unwind turret
- Industry-leading fully continuous (FC) seamer with unwind transfer speeds of 400 meters per minute
- Capable of speeds up to 600 meters per minute
- Achieve true direct shipping with the Accraply Revolve Fully Continuous
