ABOUT US

Neaustima UAB is the manufacturer of nonwovens in Lithuania. Main focus is the production of needle punched, thermal bonded, spray bonded nonwovens and PES fibre balls. We export our products to the countries in Europe and North America.

Neaustima is known as a recycler of post-industrial textile waste. We buy textile scraps, threads and recycle them into fibres that are used in further production of nonwovens.

FOUNDED

Year 1993

LOCATED

Šiauliai, Lithuania
